

## Notice of Public Information Centre #2

**Project:** Municipal Class Environmental Assessment for Union-WUC Water System Interconnection

The Union Water Supply System (UWSS) owns and operates the water system servicing the Town of Kingsville, Town of Essex, Municipality of Leamington and Municipality of Lakeshore. The Windsor Utilities Commission (WUC) operates the water system servicing the City of Windsor, the Town of LaSalle and the Town of Tecumseh.

Currently, these two independent water systems each have one supply source. The UWSS and WUC have identified an opportunity to improve supply resilience by connecting the two systems. Water supply resiliency is important for water utility emergency preparedness as climate change introduces more uncertainty in supply quality and quantity. The project team is conducting an environmental assessment to identify strategy alternatives, evaluate potential environmental impacts, and gather input from the public and other interested parties.

Figure 1 shows a map of the areas serviced by the two water systems to be connected.

This project is subject to the Municipal Class Environmental Assessment process in accordance with requirements under the Ontario *Environmental Assessment Act*. The project has been classified as Schedule B.

The second Public Information Centre (PIC) is being held to present the alternative solutions identified in this EA study, evaluation methodology, and preliminary preferred solutions. The PIC will have an open-house format, with project information presented on display boards and members of the project team present to answer questions and discuss project-related issues.

Feedback from attendees will be used to finalize the evaluation and selection of preferred solution alternatives.
